## EXPERIENCE

### IT Consultant (Level II) --- *Olenick*

[ JUNE 2015 - PRESENT ]  **Chicago, IL** | *100% Remote*

- Acting as database administrator for a client that provides auditing services for medical records coding clients, 2 years running. This role involves making critical decisions for a team of 12 as well as interacting with external clients and perspective clients. This client uses UASI Solutions, third party database software that runs over SQLServer database in the background.
- Worked with QA automation using the Behat framework, which incorporates selenium web driver and PHP scripting in the back-end. Additionally worked on manual testing for several clients with tools such as HP Application LifeCycle Management.
- Worked on an internal project management application venture as the lead front-end developer, aiding in developing new report pages as well as adding enhancements and new functionalities to the app.

### Owner, Founder --- *Greens of the Earth*

[ JUN 2017 - PRESENT ]  **Island Lake, IL**

- Natural handmade soaps, bath and body products, candles, and wax melts, registered with Illinois under the assumed business name 'Greens of the Earth'.
- Responsible for strategizing and organizing business operations of a team of a partner and myself.
- For sale online at www.greensoftheearth.com, in local craft and trade shows, and in an East Texas boutique (Simply Unique Boutique; Longview, TX).

### System Analyst/ Tech Support --- *CMU Helpdesk*

[ MAY 2014 - May 2015 ]  **Mount Pleasant, MI**

- Answered 1,500+ calls and worked on a team that served a student and faculty/staff network of over 30,000 users.
- Provided general information, campus systems support, network registration, connection, and configuration assistance, scantron test grading, and sale of licensed software and equipment.
- Trusted with access to critical systems including staging, testing, and production servers in SAP, access to sensitive user information via multiple databases, and access to blackboard as a systems administrative user.

### Intern Developer --- *Cloudbakers*

[ DEC 2014 - JAN 2015 ]  **Chicago, IL**

- Winter Break internship spent building a tool allowing a marketing end user to take data from Mail Chimp down into a Google spreadsheet for future analysis upon which they could push potential leads into Zoho CRM. Lastly the script generated and sent an email to a sales user, which contained contact information for leads who wished to be contacted by the sales team.
- Refined skills working with API's, project management, requirements gathering, and the SDLC.
